SUMMARY

Graduate of Informatics Engineering from one of the state polytechnic universities with a strong interest in Web Development. Experienced in building Laravel and React-based applications. Accustomed to working in a team, fast learner, and loves the challenge of new technologies.

EXPERIENCE

Full-Stack Developer Intern

PT. TEKNOLOGI OPTIMASI INDONESIA

June 2024 – December 2024, Malang, Jawa Timur

- Building a data scraping platform from Threads and news portals, and designing a frontend for YouTube API integration and sentiment analysis. Using backend and frontend technologies in an integrated manner to display data in real-time.

Backend Developer

Danau Emas

September 2023 – December 2024

- Build a company profile website with complete features such as company profile pages, services, galleries, contacts, and news. The system has two roles: users and admins. Admins can manage content through CRUD features, supported by seeders for initial data efficiency. Data is stored securely in the database and supports an intuitive user experience.

Front-End dan Back-End Web Developer

Studi Independen Bersertifikat – Dicoding Indonesia

September 2023 – December 2023, Kota Bandung Jawa Barat 40123

- follow the MSIB program in Web Development. Learn and work on front-end projects (HTML, CSS, JavaScript, React) and back-end (REST API, Node.js, Express, Database). Complete the final project in the form of a functional web application according to industry standards.

Tech Developer

Peserta Jagoan Digital 2023 – Banyuwangi

May 2023 – May 2023

- Participate in digital business training and incubation to develop technology-based solution ideas. Learn branding, digital marketing, and product validation with industry practitioner mentors.
